Site Location Plan

## **Relevant Local Planning Policies**

### Flintshire Unitary Development Plan (adopted 28th September 2011)

<u>Key</u>

#### **GEN1 General Requirements for Development**

Development that requires planning permission and is in accordance with the Plan's other policies, should be located on land, or within suitable buildings, which satisfies the following requirements:

- a. the development should harmonise with the site and surroundings in terms of the siting, scale, design, layout, use of space, materials, external appearance and landscaping,
- b. the development should take account of personal and community safety and security in the design and layout of development and public/private spaces;
- c. the development should not have a significant adverse impact on recognised wildlife species and habitats, woodlands, other landscape features, townscapes, built heritage, features of archaeological interest, nor the general natural and historic environment;
- d. the development should not have a significant adverse impact on the safety and amenity of nearby residents, other users of nearby land/property, or the community in general, through increased activity, disturbance, noise, dust, vibration, hazard, or the adverse effects of pollution;
- e. the development should provide, where appropriate, safe and convenient access for pedestrians, cyclists, persons with disabilities, and vehicles, together with adequate and suitably located parking spaces and servicing/manoeuvring space;
- f. the development should not have an unacceptable effect on the highway network as a result of problems arising from traffic generation, and should incorporate traffic calming measures where appropriate;
- g. the development should have, where appropriate, convenient access to public transport, and wherever possible is well related to pedestrian and cycle routes;
- h. the development must have regard to the adequacy of existing public services (e.g. gas, water, electricity), with new infrastructure capable of being provided in reasonable time and at minimum public cost;
- i. the development should not result in/be susceptible to problems related to drainage, land stability, contamination, or flooding, either on or off site;
- j. the development should not prejudice land or buildings safeguarded for other uses, or impair the development or use of adjoining land; and
- k. the development should not result in the permanent loss of the best and most versatile agricultural land where either suitable previously developed land or land in lower agricultural grades is available.
- 4.5 This policy's ultimate aim is to ensure the development of sustainable communities, by ensuring that proposals for development are submitted with the highest standards of quality and design possible, are carried out in a responsible and appropriate manner, and have the minimum adverse impacts on the physical, social and economic environment around them.
- 4.6 The criteria serve as useful development control guidance for those submitting planning applications or putting forward development proposals. Whilst comprehensive, the list of criteria does not encompass all eventualities, and should be applied, where appropriate, in conjunction with other relevant policies and proposals in the Plan.

#### WB1 Species Protection

Development which would have a significant adverse effect on important species or their habitats will not be permitted unless appropriate measures are taken to secure their long term protection and viability.

- 8.7 The presence of an important species is a material consideration in deciding a planning application. Important species or habitats are those protected by law, identified as a priority species or habitat in the UK Biodiversity Action Plan or the FBAP. Examples of protected species occurring in Flintshire include bats, badgers, barn owls, great crested news, otters and some orchids. These have statutory protection under a range of international and national legislation including: the Wildlife and Countryside Act 1981; and the Conservation (Natural Habitats & C.) Regulations 1994, both of which have a view of in maintaining biodiversity.
- 8.8 Where development is permitted the Local Planning Authority must be satisfied that the ecological interest of a site can be adequately safeguarded by means of appropriate planning conditions and/or obligations. Before development affecting a European protected species can occur, conditions contained in the Habitats Regulations must be met, that is the development is required for preserving public health, safety, or for other reasons of overriding public interest. Additionally it must be demonstrated that there is no satisfactory alternative nor should there be a detrimental affect on the maintenance of the species population at a favourable conservation status. If these tests are met the Welsh Assembly Government can issue a licence to enable development to proceed.
- 8.9 This policy seeks to protect species with regard to the development and use of land and does not override the statutory requirements for species protection as contained in Acts of Parliament or through European Law. Where the Council require mitigation or compensatory provision to be made either on site or on adjacent land, conditions will be attached or obligations required to facilitate species survival, minimise disturbance or as a last resort provide suitable alternative habitat to ensure that species are safeguarded.

#### WB5 Undesignated Wildlife Habitats

Development will be permitted only if it will not have a significant adverse effect on wildlife and habitats of local importance.

- 8.19 There are many undesignated sites which have considerable nature conservation value and represent vital elements in the County's biodiversity. Examples include natural watercourses, streams or rivers and their banks, unimproved grasslands, wetlands, heather moorland and woodlands (particularly those of ancient semi-natural origin). Some of these habitats may be comparatively rare in the Plan area, and considered to be of value on a very local basis, for example the last remaining pond close to a particular town or village. Developers will often be required to undertake detailed surveys of flora and fauna to enable the Council to ascertable.
- 8.20 Such sites may be valuable in their own right or may serve an important function in relation to adjacent areas. A feature may, for instance, form a wildlife corridor, linking areas that are vital for certain species. In addition to areas in the countryside, urban sites may be of value for wildlife. In particular, green corridors in built up areas, which may be under significant pressure, should be safeguarded. Their development may have serious implications beyond the site in question. Even brownfield sites, despite their often degraded appearance, may have significant ecological interest.
- 8.21 However planning permission will not be refused, where in accordance with national policy guidance, other material factors are sufficient to override nature conservation interests. Conditions and agreements will be used to mitigate any harmful effects to nature conservation interests.

#### WB6 Enhancement of Nature Conservation Interests

The incorporation within development proposals of measures which improve the nature conservation value of an area will be permitted by the Local Planning Authority

- 8.22 This policy recognises that, in addition to protecting habitats, opportunities will arise to increase biodiversity and geodiversity within Flintshire. Although land-take for development has gradually eroded wildlife habitats, opportunities exist to enhance ecological value through careful design of development proposals.
- 8.23 Proposals which improve the nature conservation value of sites will be encouraged. Where new development is carried out, sensitive landscaping and planting, the creation, maintenance and management of landscape features important to wildlife, and the skilled adaptation of derelict areas can provide extended habitats. The County Council will support proposals to establish local nature reserves in suitable locations. Larger scale developments will be required to consider how existing features can be enhanced, taking a strategic view of the site.

## **Site Designations**

SSSI Impact Risk Zones for Site Only

Source: MAGIC Maps

SSSI Impact Risk Zones - to assess planning applications for likely impacts on SSSIs/SACs/SPAs & Ramsar sites (England) 1. DOES PLANNING PROPOSAL FALL INTO ONE OR MORE OF THE CATEGORIES BELOW? 2. IF YES, CHECK THE CORRESPONDING DESCRIPTION(S) BELOW. LPA SHOULD CONSULT NATURAL ENGLAND ON LIKELY RISKS FROM THE FOLLOWING: **All Planning Applications** Infrastructure Wind & Solar Energy Minerals, Oil & Gas **Rural Non Residential** Residential **Rural Residential** Air Pollution Livestock & poultry units with floorspace > 500m<sup>2</sup>, slurry lagoons > 4000m<sup>2</sup>. Combustion General combustion processes >50MW energy input. Incl: energy from waste incineration, other incineration, landfill gas generation plant, pyrolysis/gasification, anaerobic digestion, sewage treatment works, other incineration/ combustion. Waste Composting **Discharges** Water Supply Notes **GUIDANCE - How to use the Impact Risk Zones** /Metadata for magic/SSSI IRZ User Guidance MAGIC.pdf 1. ## Internationally Designated Wildlife Sites within 10km of the Site

Name of Site	Designation	Distance from Site	Reason for Designation
Midland Meres and Mosses Phase 2	Ramsar	8.4km south east	Ramsar criterion 1: The site comprises a diverse range of habitats from open water to raised bog. Ramsar criterion 2: Supports a number of rare species of plants and invertebrates associated with wetlands.
Dee Estuary	Ramsar	8.6km north west	Ramsar criterion 1: Extensive intertidal mud and sand flats with large expanses of saltmarsh towards the head of the estuary. Ramsar criterion 2: Supports breeding colonies of the vulnerable Natterjack Toad. Ramsar criterion 5: Bird assemblages of international importance. Ramsar criterion 6: Species/populations occurring at levels of international importance.
River Dee and Bala Lake	SAC	6.1km east	Water courses of plain to montane levels with the Ranunculion fluitantis and Callitricho- Batrachion vegetation. Atlantic salmon.

## Source: MAGIC Maps

			Floating water- plantain.
Dee Estuary	SPA	8.5km north west	Bird assemblages of international importance.
Dee Estuary	SAC	10km north west	Mudflats and sandflats not covered by seawater at low tide. Atlantic salt meadows (Glauco- Puccinellietalia maritimae).

There are no nationally designated wildlife sites within 2km of the site.

#### Local Site Designations within 1km of the Site

Source: Magic Maps and COFNOD

#### Site Information

Area:	Flintshire
Site Name:	36SW03: Fish Pond Wood
Centroid Grid Reference:	SJ323641
Coverage:	21 acres / 8.5 hectares
Site Description:	Mixed woodland with a large carp pond. The canopy is predominantly sycamore with ash and coniferous trees and occasional oak. Alders are present around the pond edge. The shrub layer is sparse with elder, sycamore and rhododendron. In the north-west area of the wood the herb flora is rich with bramble, yellow archangel, ivy, bluebell, wood sorrel, enchanter's nightshade and bracken. The pond has no marginal vegetation although there is a small island at the centre.
Habitats:	Mixed plantation (5.345 ha), Standing water (0.639 ha)
Designation Reason:	Broad-leaved woodland and scrub, Ornithological

#### Site Information

Area:	Flintshire
Site Name:	36SW04: Bilberry Wood
Centroid Grid Reference:	SJ314643
Coverage:	270.8 acres / 109.6 hectares
Site Description:	Broad-leaved woodland and a large mixed conifer and broad-leaved plantation with patches of natural regeneration. Bilberry Wood lies on level ground crossed by many tracks. The canopy is mainly coniferous, with occasional sycamore and oak. There are frequent areas of natural regeneration with silver and downy birch and willow. The majority of the shrub layer is dominated by rhododendron although there are patches of tree saplings and occasional elder and holly. The ground flora is predominantly bracken and bramble with yellow pimpernell, bugle, enchanter's nightshade, wood sage, dog's mercury and remote sedge along the tracks. Tinkers Dale at the north end of the site is a broad-leaved woodland in the steam valley of Broughton Brook. The canopy is predominantly ash and sycamore with a few beech and planted conifers. The shrub layer is made up of hazel, ash, holly and guelder-rose. The rich ground flora has frequent dog's mercury, ferns and ivy with pendulous sedge, broad-leaved helleborine, yellow archangel, woodruff and opposite-leaved golden saxifrage.
Habitats:	Broad-leaved semi-natural woodland (14.835 ha), Coniferous plantation (17.669 ha), Mixed plantation (73.716 ha), Standing water (0.286 ha)
Designation Reason:	Broad-leaved woodland and scrub

#### Site Information

Area:	Flintshire
Site Name:	36SW06: Warred Dingle
Centroid Grid Reference:	SJ315623
Coverage:	4.2 acres / 1.7 hectares
Site Description:	Elongated, narrow broad-leaved woodland along a small stream valley. The canopy is dominated by sycamore with some oak, ash, holly and willow and occasional larch. Elder is abundant in the shrub layer, along with hawthorrn. Although the wood is grazed it is species-rich and bryophytes are frequent. Also frequent are ivy, nettle, common dog violet and bramble with black bryony, sanicle, wood sorrel and yellow pimpernel.
Habitats:	Broad-leaved semi-natural woodland (0 ha)
Designation Reason:	Broad-leaved woodland and scrub, Broad-leaved woodland and scrub

Site Information	
Area:	Flintshire
Site Name:	36SW02: The Covert and The Rookery
Centroid Grid Reference:	SJ323617
Coverage:	12.8 acres / 5.2 hectares
Site Description:	Woodland with a small lake. The woodland is mixed with many mature pine trees dominating the canopy. Below these are younger sycamore and birch trees. The understorey is also influenced by planting. there being laburnum, rhododendron and privet amongst elm, holly and elder. A small area of wet willow woodland is found at the west end of the lake. The field layer is dominated by carpets of bluebell with much ivy and lesser celandine. Other plants present include lords-and-ladies, wood-sorrel, opposite-leaved golden saxifrage and wood anemone. The lake has some marginal reed mace swamp.
Habitats:	Mixed plantation (4.324 ha), Continuous bracken (0 ha), Standing water (0.585 ha)
Designation Reason:	Broad-leaved woodland and scrub, Standing open water

## **Notable Habitats**

## Habitat Inventory Data within or Adjacent to the Site

#### Source: Cofnod

Cofnod did not present any no notable habitats within or adjacent to the site.

- TEP

## **Notable Species**

### Extract of Species Data within 1km of the Site

### Source: COFNOD

\_Species records which are listed under the following have been included:

- European Protected Species (EPS);
- Protected bird species under Schedule 1 of the Wildlife and Countryside Act 1981, as amended (WCA1);
- Protected animal species under Schedule 5 of the Wildlife and Countryside Act 1981, as amended (WCA5);
- Protected plant species under Schedule 8 of the Wildlife and Countryside Act 1981, as amended (WCA8);
- Invasive non-native species under Schedule 9 of the Wildlife and Countryside Act 1981, as amended (WCA9);
- Species of principal importance under Section 41 of the Natural Environment and Rural Communities Act 2006 (S41); and
- Red and Amber listed Birds of Conservation Concern (BRd/BAm).
